

Pressure Operated Switches • 500 psi [34.5 bar]

Description *designed for use with* **3M™ Novec™ 1230 Fire Protection Fluid**

The switch is used as a Discharge Confirmation. If the cylinder to which the switch is attached detects pressure, above the adjustable pressure set point, the switch contacts will activate, providing a signal to the Release Control Panel to indicate that the Clean Agent Cylinder has been activated. The pressure switch is wired into a circuit to give a fault signal upon activation.

Electrical Rating

250 VAC – 5 AMPS

Characteristics:

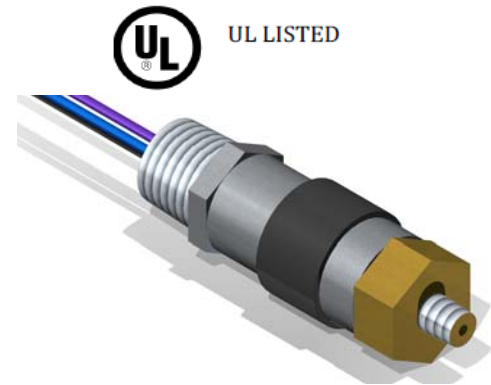

FTF-503003 Manual Reset
FTF-503005 w/o Manual Reset

Temperature Range

Ambient -20°F to +150°F [-29°C to + 65°C]
Fluid -65°F to +275°F [-54°C to + 135°C]

Others

Pressure Range:
30-600PSI (2.1-41.0 BAR) Adjustable

UL LISTED

P/N: FTF 503003/FTF 503005
